

# Controversies in Unresectable Stage III NSCLC

Real-world decisions, evolving evidence,  
and the power of the MDT

CPD-accredited webinar | 2 hours | 26<sup>th</sup> August 2025 | 16:00–18:00 (UK time)  
Online (Teams link upon registration) | FREE to attend

Despite evolving evidence  
and technological advances,  
many patients remain undertreated.

How do we  
change that?

Join us for a dynamic and highly interactive webinar exploring one of the most complex areas in thoracic oncology – the management of unresectable stage III NSCLC.

- Two focused sessions packed with case-based discussions and expert insights
- Practical decision-making strategies for complex and borderline cases
- Early-career led discussions on navigating the MDT and advocating for radical treatments

## Who Should Attend?

- Respiratory physicians
- Clinical and medical oncologists
- Thoracic surgeons
- Radiologists, nurses, and AHPs
- Trainees and early-career MDT members

## SESSION 1

**Navigating the MDT – A Complex Case referred for chemo-IO, likely to require pneumonectomy**

**Chairs:** Ashley Horne & Nadza Tokaca

**Panel:**

- Thoracic surgeon
- Radiation oncologist
- Respiratory physician
- Medical oncologist

## SESSION 2

**The Grey Zones in Stage III NSCLC – What Would You Do?**

**Chairs:** Kevin Franks & Corinne Faivre-Finn

**Real CONCORDE cases with live MDT-style input**

- ILD and borderline lung function
- Vascular invasion and central tumours
- Elderly/frail patients with multiple comorbidities
- Large volume/Bilateral disease
- Consolidation therapy - interactive
